

newsXtreme

Newspaper Prepress Production Workflow System

Product Highlights

- Three versions of NewsXtreme
 - NewsXtreme Lite – for small newspapers
 - NewsXtreme Standard – for mid- to large-size newspapers
 - NewsXtreme Enterprise – for metro newspapers needing maximum up-time
- Wizard-based plate configuration screen easily creates any style of plate templates
- NewsXtreme easily steps operator through product planning steps
- Features such as late black support, separation locking, calibration management, preflight reporting and autofixes, PDF compatibility, fan out and more...
- Seamless front-end/back-end integration and future upgradeability make NewsXtreme the most future-proof system on the market today

Web-Browser Convenience

- 100% browser enabled, cross platform Web interface
- Customized permissions for different levels of users
- Remote access for authorized users
- Production error email notifications*

Intelligent Routing & Load Balancing

- Fully automated rule-based workflow production based on file naming convention, deadlines, and other criteria
- Straightforward and customizable rule wizard set up
- Automatic load balancing to the first available device for ripping, output devices, and other misc. applications
- Manages all production file formats

Preflight & Auto-Correction

- Conversion of PostScript, EPS, and TIFF files into high quality PDFs
- Splits a multi-page PDF document into individual pages
- Automatically inspects, reports, and corrects common problems

Production Tracking

- Tracks ads, pages, and plates
- Status of production sorted by different criteria
- Resend a complete product or plate including previous versions
- Manually override automated workflow
- Adjust priority levels, deadlines, and communicate problems via annotations*

Soft Proofing with Page and Plate Approval

- Multiple sign-offs promote fewer plate-making errors
- View composite proof or individual separation of pages/plates
- Authorized users can approve (or reject) all or specific separations to move forward in the workflow
- Ability to manually override automatic routing

- Ability to collaborate and annotate proofs right down to final release of pages or plates*

Product Planning

- Step-by-step planning wizard can be used to create, modify, or copy commonly used plans
- Schedule products for broadsheets and tabs for multiple editions and zones all in one plan
- Easily add new products or outside commercial work
- Import plans from 3rd party applications such as ALS or Layout 8000*

Flexible Page Pairing & Imposition

- Step-by-step process creates new plate templates in minutes
- Supports page pairing and imposition of 16-up inside and outside double-trucks
- Add customizable page furniture (bender, press registration, cut & fold marks, etc.)
- Supports human readable text and bar codes containing static and dynamic information
- Supports creep adjustment/shingling
- Fan-out corrects web growth issues

Logging and Reporting

- Diagnose workflow problems quickly from one central location
- Logs show all system activity with time & date stamps
- Easily sort and filter logs to troubleshoot problems
- Subscribe to daily production report emails*
- Export product log for customized reporting

*Included in NewsXtreme Standard and NewsXtreme Enterprise
