Color Calibrated Soft Proof Management System

Product Highlights

- Easy-to-learn touch screen interface
- Improved color tones in process color ads
- Reduce advertiser charge-backs
- Automatic monitor calibration
- Monitor calibration verification

Press Interface

- Unlimited GUI client connections in the press room
- Fast responding touch screen console with thumbnail image identification makes management easy

Multiple Input Capabilities

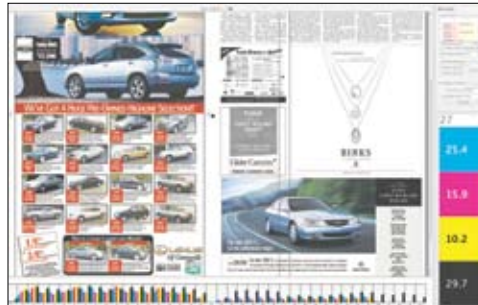

- Supports stochastic or halftone screening from single bit TIFFs
- Flexible naming convention support
- Supports most industry standard calibration devices

Simplistic Navigation

- Multi-tabbed displays allow fast switching from one side of sheet to the other
- Tabbed options for spreads, notes, and pages for easy navigation
- Pre-programmed zoom settings, finger touch zoom & panning
- 3D flipbook viewing of entire publication
- Auto-grouping of files by publication
- Unlimited press profiles based on page background, publication, size, and ICC standards

Ink Key Viewer

- Shows the actual ink key settings
- Shows excess ink
- Calculates ink weight
- Shows individual plates ink coverage

Real Dot Technology

- Preserves single bit TIFF halftone screening when down sampled
- Defuses dots and retains sharp text

Reverse Page View

- Shows precise show-through effect using different stocks
- Front and back dot gain
- Wet on wet dot gain
- View plates as positive/negative in the correct print sequence

Calibration Verifications

- Built-in monitor calibration and profiling
- Auto-verifies monitor calibration
- Import and auto generate values from any ICC profile to conform to certification standards
- Measure and create your own standards
- Verifications print with every job

Color Support

- Import color libraries
- Paper background editing
- Dot gain curves can be applied to any spot plate
- Supports ICC profiles, SNAP, and other certified standards
